Please read the description of each of the golf-specific behaviors carefully. After reading the description, think about your own golf behaviors during the past four rounds. Please answer by circling one number between 0 and 10 that best reflects how true or untrue the description is for you. The more your own behavior fits the description, the higher the number should be (0 means the description is Not True at All, 10 means the description is Precisely True).

This scale is designed to assess your strengths and weaknesses as they relate to your golf performance. This scale is not a measure of your skills as a golfer. There are no “right” or “wrong” answers. To be most useful to you, it is best to answer as honestly as possible.
